

## About Ferris Home Improvements

**F**erris Home Improvements was founded by Delaware native Walter “Reds” Ferris. Walter began the company with only one full-time crew member -- himself, but has since grown FHI rapidly, employing a full-time crew and running several trucks throughout day. Our construction team has over 40 years of experience, specializing in both commercial & residential and exterior & interior property improvements. On average, FHI completes thousands of jobs each year, but we are proud to maintain an A+ Better Business Bureau rating with our small-company customer service. Walter puts it best: “Our professionalism and quality of workmanship is that of a large company, but our customer experience is that of a small company--sure to please.”

“My team and I always look forward to meeting our customers because we want them to know that they can trust us. Chances are I’ve already met them before or I know someone in their social circle because I was born and raised in New Castle county, and now my family and I live in Wilmington,” says Ferris. For Ferris Home Improvements, being a locally owned and operated contractor is a considerable asset in an industry that has a tough reputation for establishing trust:

*“Many customers hiring a contractor never know what they’re getting when they sign a contract, but I see my customers at the ball fields, the grocery store, at church and the sports bar, so I never leave a job that I’m not proud to put my name on,”* says Ferris.

Ferris Home Improvements is also very active in the community. We regularly sponsor the Stanton-Newport Little League, local sports teams, donate funds to programs designed to improve the community, donate maintenance services to the elderly in need, and support local food and gift drives during the holidays. “It’s natural for us to give back to the neighborhood because it’s in line with our company’s focus -- our customers. Repairing, renovating, and improving the value of your property not only makes your home a better place to live, but it also makes our community a better place to live and raise a family, which is what all of us want,” says Ferris.
